

Executive Health Check-up

“Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.”

(World Health Organization)

Regular health exams and tests can help to find problems before they start. They also can detect problems early, when your chances for treatment and cure are better. By getting the right health services, screenings, and treatments, you are taking steps that help your chances for living a longer, healthier life. Your age, health and family history, lifestyle choices (i.e. what you eat, how active you are, whether you smoke), and other important factors impact what and how often you need healthcare. Our package includes the following...

Laboratory Investigations:

Lipid Profile

- Total cholesterol
- Triglycerides
- HDL
